Qualcomm® AI Hub Apps

The Qualcomm® AI Hub Apps are a collection of sample apps and tutorials to help deploy machine learning models on Qualcomm® devices.

Each app is designed to work with one or more models from [Qualcomm® AI Hub Models](#).

With this repository, you can...

- Explore apps optimized for on-device deployment of various machine learning tasks.
- View open-source app recipes for running [Qualcomm® AI Hub Models](#) on local devices.
- Find tutorials for end-to-end workflows.

🔗 Overview

🔗 Supported runtimes

- [TensorFlow Lite](#)
- [ONNX](#)
- Genie SDK (Generative AI runtime on top of [Qualcomm® AI Engine Direct SDK](#))

🔗 Supported Deployment Targets

- Android 11 Red Velvet Cake & Newer, API v30+
- Windows 11
- Ubuntu 24.04+

🔗 Supported compute units

- CPU, GPU, NPU (includes [hexagon HTP](#))

🔗 Chipsets supported for NPU Acceleration

- [Snapdragon X2 Elite](#)
- [Snapdragon X Elite](#)
- [Snapdragon 8 Elite Gen 5](#)
- [Snapdragon 8 Elite](#)
- [Snapdragon 8 Gen 3](#)
- [Snapdragon 8 Gen 2](#)
- ... and all other [Snapdragon® chipsets supported by the QAI RT SDK](#)

Weight and activation type required for NPU Acceleration:

- Floating Point: FP16 (All Snapdragon® chipsets with Hexagon® Architecture v69 or newer)
- Integer : INT8 or INT16 (All Snapdragon® chipsets)

NOTE: Some of these apps will run without NPU acceleration on non-Snapdragon® chipsets.

🔗 Getting Started with Apps

1. Search for your desired OS & app in the tables below.
2. The README of the selected app will contain build & installation instructions.

Contributors: See [CONTRIBUTING.md](#) for dev setup, repo architecture, and how to add new apps.

🔗 Android App Directory

Task	Language	Inference API	Special Tags
ChatApp	Java/C++	Genie SDK	LLM, GenAI
Image Classification	Java	TensorFlow Lite	
Object Detection *	Java	TensorFlow Lite	OpenCV, Live Camera Feed
Semantic Segmentation	Java	TensorFlow Lite	OpenCV, Live Camera Feed
Super Resolution	Java	TensorFlow Lite	
WhisperKit (Speech to Text)	Various	TensorFlow Lite	

🔗 Windows App Directory

Task	Language	Inference API	Special Tags
ChatApp *	C++	Genie SDK	LLM, GenAI
Image Classification *	C++	ONNX	OpenCV
Object Detection *	C++	ONNX	OpenCV
Super Resolution *	C++	ONNX	OpenCV
Whisper Speech-to-Text	Python	ONNX	
Stable Diffusion Image Generation	Python	ONNX	

🔗 Ubuntu App Directory

Task	Language	Inference API	Special Tags
Hand Gesture Recognition	Python	TensorFlow Lite	GStreamer
