

Visual Architecture Map (Docs Width)

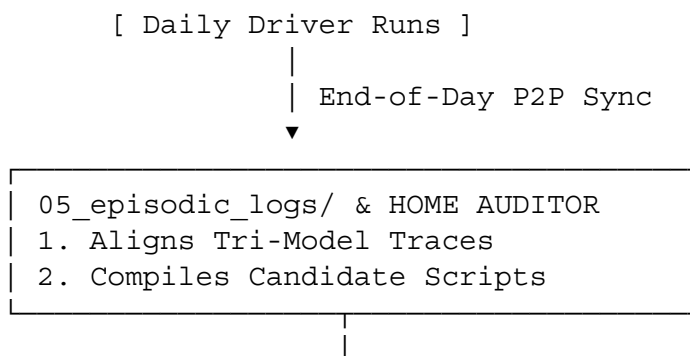

Compact Tier Summary

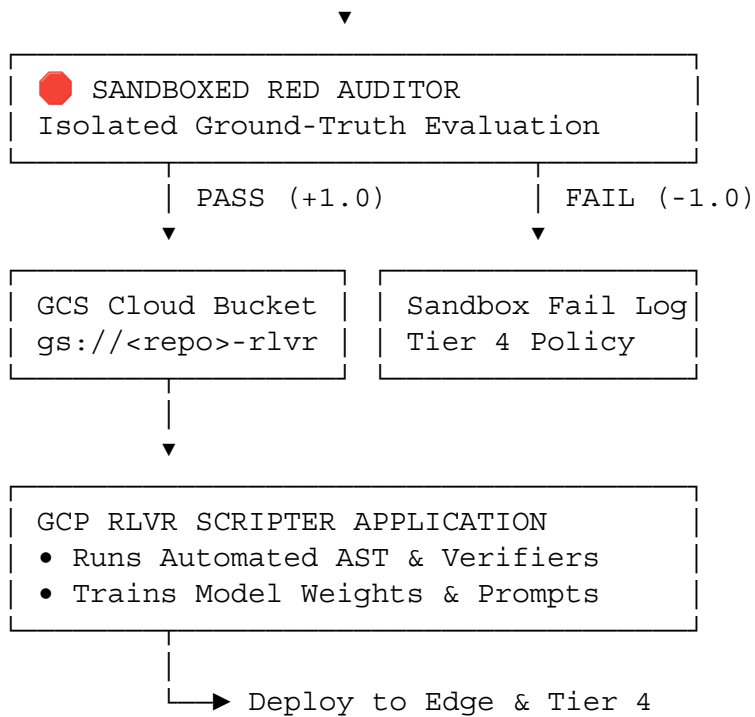

-  **Root Index:** MAP.md (human links) & manifest.jsonl (global hashes).
-  **Tier 1 (01_raw_sources/):** Raw PDFs, media, and text. *Strictly read-only.*
-  **Tier 2 (02_wiki_md/):** The LLM Wiki. Managed via OpenWiki TUI by the Files Executive Agent.
-  **Tier 3 (03_recall_cache/):** Tokenized .jsonl chunks & vectors. Ephemeral machine buffer.
-  **Tier 4 (04_skills_runtime/):** SKILL.md prompts + extracted .sh/.py CLI tools.
-  **Tier 5 (05_episodic_logs/):** Tri-model trajectory logs, red audits & RLVR verifiers.

Data Flow 1: Daytime Ingestion & Context

Data Flow 2: Nighttime P2P Audit & Cloud RLVR

✓ Verification Reference (Docs Compact)

Target Subsystem	Audit Inspection Point	Expected Verification State
Manifests	Root + all 5 tier folders	Non-empty manifest.jsonl in each.
LLM Wiki	02_wiki_md/ (OpenWiki)	Zero dead links; frontmatter intact.
Dual Extract	04_skills_runtime/	Ingest yields both tools and skills.
P2P Sync	05_episodic_logs/sync/	Daily logs arrive with tri-model tags.
Red Gate	05_episodic_logs/red/	Cloud upload queue is 100% approved.
RLVR Log	05_episodic_logs/rlvr/	Graded runs show +1.0 or -1.0.

💡 Quick Docs Export Tip

When you paste this into Google Docs:

1. Highlight the code box blocks (the YAML tree and the two Flow diagrams).
2. Set their font to **Courier New**, **Consolas**, or **Roboto Mono** at **8.5pt** or **9pt**.
3. This guarantees the boxes will sit completely flat with zero wrapping, leaving ample headroom before any page margins.
