

AGENTS.md — Operational Contracts & Hard Rules for Novaexopia

Core Invariants

1. **Non-1:1 Condensation Law:**
 - Strip conversational filler and duplicate boilerplate.
 - Maintain 100% build fidelity so that raw and clean markdown build the exact same output.
2. **Red Auditor Stealth Invariant:**
 - The Red Auditor agent lives strictly outside the repository tree in `~/red/`.
 - Never write to or create `.red/` or `.incognito_red_sandbox/` within the repository.
 - Only expose the `red_verdict: pass|fail|n/a` field on trajectory records.
3. **Locality of Reference:**
 - Skills and tools live locally inside the repository where they are applied (`skills/`, `tools/`, `scripts/`, `hooks/`).
4. **Hard Rule 5 (Extractor Independence):**
 - Ingestion passes must be verified using disjoint extractors (`tools/check.py`) before committing to the wiki.
5. **The First-Move Directive:**
 - Read `MAP.md` (orient) → Read tier `MAP.md` (focus) → Query `manifest.jsonl` (filter) → Load targeted files only.
