

MAP.md — novus-aexenti Navigation Map & Component Ontology

Subsystem Navigation

This file is the human and agent orientation map for `novus-aexenti`.

Per the First-Move Directive: Read this file first on session start to answer "what is here".

Domain-Specific Components

- `[[dual_agent_router]]`: Fast triage routing (0.8B) vs execution dispatch (9B).
- `[[mem0_episodic]]`: In-session episodic state & user habits on mobile RAM.
- `[[reasoning_bank]]`: Task step recovery ledgers (`active\_execution\_paths.json`).
- `[[nope_databank]]`: Negative prompt constraints, anti-patterns, and rejection boundaries.

Universal Baseline Directories (10 Subfolders)

- `[[raw]]`: Sensory buffer for incoming cognitive traces.
- `[[clean_md]]`: Normalized markdown (100% build fidelity, non-1:1 condensation).
- `[[wiki_md]]`: Compounding Living Wiki knowledge cards.
- `[[skills]]`: Local procedural heuristics and reasoning prompts.
- `[[tools]]`: Local execution tools and utilities.
- `[[scripts]]`: Executable shell and Python scripts.
- `[[hooks]]`: Lifecycle, git, and sync hooks.
- `[[pending]]`: Staged tickets and unverified outputs.
- `[[audit]]`: RLVR verification reports and test logs.
- `[[archive]]`: Deprecated traces and historical records.
