

05_FEDERATED_FILE_TREE_TOPOLOGY_MASTER.md

Master Federated File Tree Topology: Project __NovÆxorpus(NÆX) & ___Lex-Novi-Æxentis-Copiæ

Motto: *Xçineribus, in-variis-nunquam-varius, Novi-Æxentis-Copiæ, Vincent*
Scope: Complete federated architectural file tree mapping both master folders across mobile edge, server mesh, and cloud pipelines.

1. Dual Master Folder Operational Synthesis

This master tree synthesizes both parent repositories into a unified, non-conflicting topology:

- **Master Folder 1: __NovÆxorpus(NÆX):** Phased focus (Phases 1 through 4); houses the curated 140-file stack, active working drafts, and the 5+1 Cognitive Memory specifications.
- **Master Folder 2: ___Lex-Novi-Æxentis-Copiæ:** Phased focus (Phases 2 through 8); houses the deep historical documentation vaults, vendor libraries, APK assets, and git repositories across 14 master subfolders.

2. Complete Federated Multi-Corpora Master Tree

3. Cross-Repository Mapping of the 14 Master Subfolders

The 14 subfolders in **___Lex-~~Novi~~-~~A~~xentis-Copia** map directly into this federated topology:

Subfolder in ___Lex-Novi-Axentis-Copia	Target Destination in Master Tree	Primary Technical Assets Extracted
Agent-Assets&Global-Documentation_Vault	vendor-corpora/ & 01_raw_sources/	Immutable vendor manuals (#QAIRT_main, GOOGLE-DEV-DOCS, unsloth-docs, llama-docs, FraQAT).
---📜🍷 A sop-Xi_	aesop-xi/	Master ethical arbitration logic, tool guardrails, and security policies.

Subfolder in ___Lex-Novi-Æxentis-Copia	Target Destination in Master Tree	Primary Technical Assets Extracted
---•🌐🔧_BUILDERS_GUIDE_📄~	02_wiki_md/architectures/	Hardware build guides, VESA field monitor mounts, passive heatsink designs.
Registries	02_wiki_md/entities/	Schema contracts, hardware profiles, device specifications.
--•🔥HORIZONS_UI_🌐	novaexopia/horizons-ui/	Native Android Kotlin UI code, Chromium WebView layouts, chat tiles.
--•🦁NovusÆxenti🌱NovÆcopia🕸•~	novus-aexenti/ & novaexopia/	Reasoning MoE core, dual-model router, and harness runtimes.
._#_Dumbass-Vault.md	#d.u.m.b.a.s.s. Core & Spec 02	Memory bank schemas, SQLite/Postgres DDLs, and recovery ledgers.
.Claude	04_skills_runtime/prompts_skills/	Claude Code CLI configurations, custom slash commands, and prompts.
--📁~SKILLS.md_🔧_	skills-and-capabilities/	Curated SKILL.md libraries (Pocock, Honey for Devs, ECC).
--->📖.ReadMe*	Root README.md & MAP.md	Canonical master readmes, visual architecture trees, and index maps.
--•💻_TERMUX_[>_]_main.	novaexopia/aesc/	Shell daemon scripts, ADB loopback hooks, and terminal utilities.
--•📱🔗_GITHUB_📁💻~	Repository CI/CD roots	GitHub Actions workflows, build configs, and automated test runners.

Subfolder in ___Lex-Novi-Æxentis-Co pia	Target Destination in Master Tree	Primary Technical Assets Extracted
yJSONL_data.bank_	03_recall_cache/jsonl/	Compacted JSONL RAG/KAG index markers and pre-tokenized chunks.
Reverse-Engineering	novaexopia/aesc/ & aeyre/	Decompiled Horizons APK assets, salvaged native C++ offload libraries.
