

Plugins, Tools, and Framework Evaluation Matrix

Mined from: [PLUGINS TOOLS AND MEMORY LAYER ARGUMENTS \(File 6\)](#)

1. Executive Disposition of External Tools & Repositories

Tool / Framework	Target Subsystem	Role & Implementation Decision	Disposition
NovA-orca	Orchestration Layer	Automated Development Environment (ADE) for running parallel agent fleets across desktop, phone, and server nodes.	Adopt as fleet runner.
ECC (Everything Claude Code)	skills-and-capabilities	Unified skills/instincts/memory harness working across Claude Code, Codex, and Cursor.	Adopt as cross-agent harness standard.
c10vis--pi	Node Beta (Jetson)	Home-node coding agent CLI backed by tmux resurrect.	Keep for background home compute.
crawl4ai	data_vault/04_skills_runtime	High-speed headless web scraper for tech repository monitoring and document extraction.	Adopt for discovery ingestion pipeline.
browser-use	novaexopia/horizons-ui	Interactive browser automation engine for user interface tasks and web actions.	Adopt for Horizons UI browser tab.
JetBrains Kotlin SDK	novaexopia/aesc	Native Kotlin Model Context Protocol (MCP) SDK. Bridges	Adopt as core native APK dependency.

Tool / Framework	Target Subsystem	Role & Implementation Decision	Disposition
		Android daemons directly into MCP servers.	
anything-llm	Cold Vault Reference	Comprehensive local-LLM platform; competes with native custom architecture rather than serving it.	Park in 01_raw_sources/ as reference only.
SuperClaude Framework	skills-and-capabilities	Overlaps with custom Matt Pocock / ECC skills. Selective ingestion of persona templates only.	Synthesize into prompt_skills/ .
