Backlog & Open Tickets

Active Backlog & Optimization Tickets

Ticket ID	Subsystem	Priority	Description & Technical Target
NX-01	<code>aesc</code> / ADB	HIGH	Zero-Root Local Pairing Automation: Implement automated mDNS pairing detection inside <code>WirelessAdbBridgeService</code> so the user only enters the 6-digit Android Wireless Debugging code once via Horizons UI dialog without requiring manual terminal bootstrapping.
NX-02	<code>aesc</code> ↔ <code>ayre</code>	HIGH	Zero-Copy Shared Memory (ASharedMemory): Implement Android NDK <code>ASharedMemory_create + mmap</code> over abstract UNIX domain sockets (<code>\0aesc_ipc</code>) with <code>SCM_RIGHTS</code> fd passing. Eliminates Android 1MB Binder transaction limits when passing raw

Ticket ID	Subsystem	Priority	Description & Technical Target
			PCM audio chunks and screenshot bitmaps between daemons.
NX-03	aeyre / Vision	MEDIUM	Dual-Display Dynamic Crop Bounds: Benchmark dynamic switching of <code>screen_vision_bounds.json</code> when the Motorola Razr Ultra flips between internal 22:9 (1080x2640) and external cover 1:1 (1056x1066) displays, ensuring VLM crop coordinates scale without restarting the daemon.
NX-04	mcp_connectors	MEDIUM	Tailscale Mesh Auto-Reconnection: Add automatic exponential backoff retry in <code>postgres_mcp.json</code> / client wrappers when switching between local Wi-Fi router switch mode and cellular Tailscale tunnels to Node Beta.
NX-05	openwiki-tui-harness	LOW	Low-Memory Profiling for GLM-5.2: Profile <code>file_administrat</code>

Ticket ID	Subsystem	Priority	Description & Technical Target
			<code>or.yaml</code> CPU and memory consumption in Termux under low background ionice to verify that disk tree sweeps do not cause frame drops in Horizons UI WebView.

Resolved Architectural Debt

- ☑ Removed deprecated naming artifacts ("Omni Claw" permanently removed across all documentation and schemas).
- ☑ Formalized decoupled 3-APK IPC contracts over WebSockets and UNIX domain sockets.
- ☑ Standardized universal repository root control files (`MAP.md`, `manifest.jsonl`, `AGENTS.md`, `RESUME.md`, `UNRESOLVED.md`).
