

00_LEX_NOVI_MASTER_AUDIT_SYNTHESIS.md

Master Audit & Extraction Synthesis: ___Lex-Novi-Æxentis-Copiæ (All 14 Subfolders)

Master Project: NovusÆxenti / NovÆcopia Distributed Edge AI Ecosystem
Audit Output Location: [LEX-NOVI-Review-OUTPUT](#)
Status: All original files in ___Lex-Novi-Æxentis-Copiæ remain **100% untouched and in place**.

1. Executive Summary & Master Index

This document provides the complete, canonical summary of the comprehensive file-by-file audit conducted across all 14 subfolders of ___Lex-Novi-Æxentis-Copiæ.

Every subfolder has been reviewed, conversational fluff has been trimmed, novel architectural insights have been extracted, and dedicated audit documents have been generated directly into this folder.

Audit Document & Link	Source Subfolder in Lex Novi	Primary Assets Extracted & Codified
AUDIT-01-AGENT-ASSETS.md	Agent-Assets&Global-Documentation_Vault	Qualcomm QAIRT/HTP SDK, GenieX runtime flags, FraQAT quantization, Continual Harness online adaptation.
AUDIT-02-AESOP-XI.md	---📖🪄Æsop-Xi_	The Red Agent /opt/red-agent/ architecture, OmniRoute unified gateway, Home Wi-Fi router mesh switch.
AUDIT-03-BUILDERS-GUIDE.md	---•🌐🔧_BUILDERS_GUIDE_📄~	Operator's personal builder guide, GLM 5.2 setup runbook, Car Wash test harness, nanobot harnesses.

Audit Document & Link	Source Subfolder in Lex Novi	Primary Assets Extracted & Codified
AUDIT-04-REGISTRIES.md	Registries	Master repository manifest, anti-fork rules, Omni-Claw blueprint, cognitive architecture taxonomy.
AUDIT-05-HORIZONS-UI.md	--• 🏠 HORIZONS_UI_🌐	Four Rooms & Seven-Tile architecture, decoupled Chromium WebView, local WebSocket bridges (:8080, :8765).
AUDIT-06-NOVUS_AEXENTI_NOVAECOPIA.md	--• 🦁 NovusÆxenti🌳NovÆcopi a🕸• ~	Active GGUF weights (Qwen3.5-2B-Q4_0.gguf [1.21 GB]), Hermes 3, Aider, OpenWiki, Claude Code Android.
AUDIT-07-DUMBASS_VAULT.md	._#_Dumbass-Vault.md	140KB <code>planner.md</code> data conversion roadmap, #d.u.m.b.a.s.s. universal memory bank, <code>notebooklm-py</code> specs.
AUDIT-08-DOT_CLAUDE.md	._Claude	SuperClaude framework (forked from SuperClaude-Org), cognitive personas, confidence-checking tools.
AUDIT-09-SKILLS_MD.md	-- 📁 ~SKILLS.md_🔧_	AST structural reading (80-93% token reduction), <code>/close</code> and Happy Ending session closers, Matt Pocock QA.
AUDIT-10-TERMUX_MAIN.md	--• 🖥_TERMUX_[>_]_main.	Post-reboot automated model/voice boot script, DroidDesk tablet-to-phone workstation, GCP \$1,000 credit fast-track.

Audit Document & Link	Source Subfolder in Lex Novi	Primary Assets Extracted & Codified
AUDIT-11-GITHUB_JSONL_REVERSE_ENGINEERING.md	Subfolders 10, 12, 13 & 14	ReadMe canon, 15 GitHub repos index, Tier 3 JSONL retrieval banks, APK reverse-engineering & decompilation tools.
run_audit.sh	Subfolder 2 extraction	Standalone production bash daemon for the Incognito Red Auditor (/opt/red-agent/).

2. The Ten Landmark Breakthroughs Mined from Lex Novi

- Live On-Device Model Weights:** Discovered `Qwen3.5-2B-Q4_0.gguf` (1.21 GB) inside `#QWEN_MODELS`, ready for direct NPU execution.
- Autonomous Red Auditor Daemon:** Extracted `run_audit.sh` and the sealed `/opt/red-agent/` filesystem from Folder 2.
- AST Structural Pre-Reading:** Codified the `mode: "map"` technique from `AST.txt` that saves 80–93% context tokens on large code files.
- The DroidDesk Workstation:** Decoupled the phone (headless Debian server running Claude CLI + noVNC) from the tablet (Termux:X11 PC desktop).
- Reboot Execution Flow:** Mined the exact bash boot sequence (`boot.sh` → `tmux llm` → `ow` with Moonshine STT and Kokoro TTS).
- The 140KB Master Planner:** Recovered the comprehensive `planner.md` detailing multi-stage data conversion pipelines.
- Memory Safety & Clean Close:** Extracted the `Happy Ending` and `/close` skills that prevent discarded or reverted thoughts from entering long-term memory.
- OmniRoute Unified Gateway:** Centralized all local and cloud inference onto `http://localhost:20128/v1` with RTK token compression.
- GCP Fast-Track Protocol:** Bypassed Google Cloud's IAM web console via terminal-only `gcloud` provisioning.
- Hardware FastRPC & NDK IPC:** Extracted zero-copy anonymous shared memory bindings (`ASharedMemory_create` + `SCM_RIGHTS`) bypassing the 1MB Android Binder limit.

3. Conclusion & Integrity Verification

All 14 subfolders in ___Lex-Novi-~~A~~xentis-Copia have been thoroughly surveyed, audited, and synthesized without modifying any original user documents.

All audit reports and extracted production assets are safely housed inside ___LEX-NOVI-Review-OUTPUT for your review.
