

AUDIT_LEX_NOVI_AESOP_XI.md

Audit & Extraction Report: Subfolder 2 of

__Lex-Novi-Æxentis-Copiæ (--- 📜 ✍️ Æsop-Xi)

Scope: Detailed file-by-file audit, fluff trimming, and architectural extractions from
--- 📜 ✍️ Æsop-Xi_.

Parent Source: __Lex-Novi-Æxentis-Copiæ/--- 📜 ✍️ Æsop-Xi_
(1jps9u-uFBW7-ZXJkFu_aH8cZkf9TFX7p).

Status: All original files preserved 100% untouched.

1. Executive Summary & Core Architectural Extractions

Folder --- 📜 ✍️ Æsop-Xi_ houses the **Ethical Orchestration, Shadow Red Gatekeeping, Daemon Superstructures, and Unified Gateway** specifications for the entire ecosystem.

Four foundational technical breakthroughs were mined directly from this folder:

- 1. The Red Agent /opt/red-agent/ Architecture & run_audit.sh Daemon:**
 - *Source:* Probably going to utilize unsloth ui or gin and I for Deb's... (1WuSPIAhfhV2qacQ419bABhGD3bid1iI4NUFf9uTcIw).
 - *Extraction:* The complete fail-closed filesystem layout (incoming/, audit/approved/, audit/quarantined/, state/audit_ledger.db), the automated JSON validation loop, and the asynchronous P2P hand-off protocol.
- 2. OmniRoute Unified Gateway & Token Compression Engine:**
 - *Source:* OmniRoute.docx (1TdUu3Z6GoPSYbCQpUzonzfMLukRbEndX).
 - *Extraction:* Centralized entry point on <http://localhost:20128/v1>, RTK/Caveman token compression (15–95% payload reduction), local-first fallback combos, and native MCP server interfaces.
- 3. The Home Wi-Fi Router Server Protocol:**
 - *Source:* The Home Wi-Fi Router Server Idea (1zVl0V5kcuLkHIdthpVs62KpM-vlHTITb).
 - *Extraction:* Local air-gapped networking switch strategy utilizing a standalone router to bridge phone Wi-Fi to dev board Gigabit Ethernet with zero internet data usage.
- 4. The On-Device Æsop Daemon Stack:**
 - *Source:* Copy of aesop-wiki.md (1aVdzLTWP7kKsZrI4gGXLdvvb2Vj8Q8DC).

- *Extraction:* Runit/termux-services supervision (`llamad` on 8081, `aesopd` WebSocket bridge on 8765), and Gemma 4 12B IT QAT Q4_0 memory management parameters (`-fa -ctk q8_0 -ctv q8_0, -t 6` big cores).

2. File-by-File Audit & Disposition Matrix

Item Title & Link	Format	Core Technical Content	Actions Taken & Architectural Disposition
Probably going to utilize unsloth ui...	Doc (4.6 KB)	The Red Agent Blueprint: Full <code>/opt/red-agent/</code> tree, <code>run_audit.sh</code> bash daemon script, and fail-closed isolation rules.	[EXTRACT SCRIPT & ENVELOP INTO SPEC 00 & README_AESOP_XI] Trimmed conversational Q&A framing; script extracted to <code>.incognito_red_sandbox/</code> .
OmniRoute.docx	Word (10.2 KB)	OmniRoute Architecture: Single endpoint (<code>:20128/v1</code>), RTK token compression, combo failover, and native MCP gateway.	[TRIM FLUFF & ENVELOP INTO SPEC 02 & SPEC 03] Replaced fragmented provider explanations with unified gateway contract.
Copy of aesop-wiki.md	MD (2.1 KB)	Æsop Runtime Stack: Runit daemon configs (<code>llamad-run</code> , <code>aesopd-run</code>), WebSocket on 8765, and Gemma 4 12B QAT RAM tuning.	[TRIM FLUFF & ENVELOP INTO README_NOVAEXOPIA] Cleaned historical commit notes into active daemon spec.
The Home Wi-Fi Router Server Idea	PDF (701 KB)	Local Mesh Networking: Using	[EXTRACT TOPOLOGY &

Item Title & Link	Format	Core Technical Content	Actions Taken & Architectural Disposition
		standalone Wi-Fi router as a high-speed LAN switch bridging phone Wi-Fi to dev board Ethernet.	ENVELOP INTO SPEC 01] Codified into physical hardware mesh topology.
Æsc-Æyre	Doc (2.9 KB)	APK Separation: Early draft defining the separation between Terminal Daemon (Æsc) and Media Daemon (Æyre).	[COMBINE & SUPERSEDED BY SPEC 01] Full Kotlin code live in WirelessAdbBridgeService.kt .
multimodal-images.md	MD (15.7 KB)	Screen Vision Pipeline: Canvas parsing, screenshot capture rates, and VLM tokenization for Æyre daemon.	[TRIM FLUFF & INGEST INTO 02_WIKI_MD/ARCHITECTURES/] Extracted vision bounds to README_NOVAEXOPIA.md .
SHA256SUMS.md	MD (0.5 KB)	Model Cryptographic Checksums: Official SHA256 hashes for Qwen 3.5 9B Q4_0 and Gemma 4 weights.	[KEEP OUTRIGHT - INTEGRITY CANON] Mirrored into 03_recall_cache/kv_store/ .
memory-as-skill.skill	ZIP (5.5 KB)	Claude Code Memory Package: Packaged skill treating episodic memory querying as an invocable slash tool.	[EXTRACT SKILL TO 04_SKILLS_RUNTIME/PROMPT_SKILLS/]

3. Subfolder Audit & Consolidation

1.  [Æsc&Æyer:](#)
 - Contains 14 items detailing daemon configurations, ADB loopbacks, and speech pipelines (`device-stt-tts`).
 - *Action:* Fully synthesized into `README_NOVAEXOPIA.md` and `01_SOVEREIGN_NODE_AND_APK_TOPOLOGY.md`.
2.  [#D.U.M.B.A.S.S..md:](#)
 - Contains relational database definitions and memory bank schemas.
 - *Action:* Codified into `02_DUMBASS_UNIVERSAL_MEMORY_SPEC.md`.
3.  [Omni route and ob1:](#)
 - Contains fallback combo definitions and PostgreSQL OB1 static query protocols.
 - *Action:* Merged with `OmniRoute.docx` into Spec 02.
4.  [AESOP XI: INPUT FILTER & ASYMMETRIC CONTEXT RETRIEVAL...:](#)
 - Defines the input sanitizer filtering out conversational filler before prompts hit the 9B model.
 - *Action:* Ingested into `04_skills_runtime/policies/input_filter_policy.md`.
5.  [Old Plans+Good Data:](#)
 - Historical iterations of the build roadmap; superseded by Master Spec 00 and Spec 05.
 - *Action:* Retained untouched in place for historical provenance.

4. What Was Combined & Trimmed

- **Conversational Fluff Stripped:** Introductory conversational exchanges, speculative brainstorming about codespaces, and obsolete single-model architectures were eliminated.
- **Unified Red Auditor Logic:** Merged the `/opt/red-agent/` file system layout and `run_audit.sh` directly into the `.incognito_red_sandbox/` section of `README_AESOP_XI.md` and `00_DEFINITIVE_MASTER_SPECIFICATION_V3_COMPLETE.md`.
- **Network Unification:** Combined `The Home Wi-Fi Router Server Idea` with your active Snapdragon 8 Elite port assignments to establish the complete local mesh without internet data consumption.
