

AUDIT-03-BUILDERS-GUIDE.md

Audit & Extraction Report: Subfolder 3 of
___Lex-Novi-Æxentis-Copiae
(---•🌐🔧_BUILDERS_GUIDE_📄~)

Scope: Operator's personal builder guide, tricks, tips, to-do lists, and implementation runbooks.
Parent Source: ___Lex-Novi-Æxentis-Copiae/---•🌐🔧_BUILDERS_GUIDE_📄~
(1M5398p0af0V_fZtCsk41WJqTXR_RNc0M).
Status: All original files preserved 100% untouched.

1. Purpose & Architectural Mapping

Per operator clarification, ---•🌐🔧_BUILDERS_GUIDE_📄~ is designated for **Personal Operator Use**: housing implementation tricks, workflow tips, operational staging, and active to-do checklists.

Target Placement in the Living Multi-Corpora:

- **Human Playbooks & Runbooks:** Ingested into `data_vault_sandbox/personal_knowledge/` and `02_wiki_md/runbooks/`.
- **Operational Directives:** Extracted into modular skill templates in `04_skills_runtime/prompt_skills/`.
- **Staging & Holding:** Preserves active to-do items without polluting cold sensory archives (`01_raw_sources/`) or machine vector caches (`03_recall_cache/`).

2. Internal Subfolder Breakdown & Audit

3. Detailed Technical Extractions

A. GLM 5.2 Setup Runbook (2026-08-28_GLM.setup.guide.md)

- *Content:* Terminal step-by-step for pairing OpenWiki CLI with OpenRouter and GLM 5.2.
- *Action:* Extracted as a ready-to-run operator playbook into [02_wiki_md/runbooks/glm_setup_guide.md](#).

B. Nanobot Personal AI Agent Framework

([nanobot-personal-ai-agent-notebook.md](#))

- *Content:* Lightweight micro-agent container hooks ([smol-agents](#), specialized nanobots) designed to run fractional sub-tasks under low RAM constraints.
- *Action:* Codified into [novaexopia/modular_harnesses/local-nanobots/](#).

C. Orchestrator Launch Sequence ([Orchestrator Agent Build Launch](#))

- *Content:* Execution order: (1) start ADB loopback on port 5555, (2) spawn Ktor WebSocket on 8080, (3) verify NPU socket on [/dev/socket/npu_manager.sock](#), (4) launch Horizons WebView.
- *Action:* Codified into [01_SOVEREIGN_NODE_AND_APK_TOPOLOGY.md](#) startup sequence.

D. The "Car Wash Test" Harness

- *Content:* Synthetic multi-step integration test designed to pass a complex prompt through voice ingress ([Æyre](#)) → triage (0.8B) → executor (9B) → tool execution → audio response.
 - *Action:* Ingested into [05_episodic_logs/hygiene_reports/car_wash_integration_test.md](#).
-

4. What Was Combined & What Was Trimmed

- **Fluff Trimmed:**
 - Duplicate PDF copies of Google Docs ([Building inside of Google.pdf](#), [ACFr0g..._copy.pdf](#)).
 - Conversational transcripts from early grilling sessions were condensed to their actionable engineering decisions.
 - **Combined Runbooks:**
 - Synthesized [Three-APK.txt](#) with your production [WirelessAdbBridgeService.kt](#) to finalize the native daemon launch script.
 - Merged [gcp-cross-account-handshake](#) and [Google_Build](#) into a unified cloud synchronization guide.
-

5. Architectural Alignment

- This folder represents the **Operator's Personal Command & Runbook Layer**.

- It is archived into `data_vault_sandbox/personal_knowledge/` so you have immediate access to your tricks, tips, and to-do lists without mixing operational human notes into machine-facing vector databases.
