

horizons-ui (Horizons APK 1 Visual Shell)

Role & Scope

Master visual presentation shell, Android Chromium WebView concierge UI, and Jetpack Compose interface.

Decoupled from native terminal daemons (aesc) and media ingress (aeyre) to prevent Android Low Memory Killer (LMK) eviction.

Salvage Invariants (Part 10 of Proposal V2)

Only 5 salvage components extracted from legacy Horizons codebase:

1. Model loading code (QAIRT + GenieX bindings) -> model_loaders/
2. ADB loopback client -> aesc/
3. Chromium browser integration -> webview/
4. Terminal UI rendering -> aesc/
5. Router system -> connectivity/
