

# novae-xorpus — Master Living Canon & Universal Memory Vault

**Role:** Hardened universal database, Living Wiki vault, and ground truth repository across the 8-repository federated ecosystem.

**Subsystem Authority:** Houses the `#d.u.m.b.a.s.s.` integrated memory engine, the 5+1 Cognitive Tiers, and the 18-Branch Living Wiki.

---

## Architectural Grounding & Authorities

- Master Topology: [1 main dumbass map](#)
  - Operational Invariants & Glossary: [PROPOSAL-V2-CORRECTED-WIKI-TERMINOLOGY-AND-s-tier-ALTERNATIVE.md](#)
  - Universal Memory Core: [02\\_DUMBASS\\_UNIVERSAL\\_MEMORY\\_SPEC.md](#)
- 

## Core Capabilities

1. **Integrated Memory Tap (`omniroute` on Port 20128):** Asynchronously intercepts prompt/response flows and extracts facts, habits, and execution traces into `ob1_protocol/`, `mem0/`, and `reasoning_bank/`.
2. **Deterministic Extraction:** Translates sensory raw files into high-density Markdown while enforcing the Non-1:1 Condensation Law.
3. **Master Registries:** Houses the authoritative ecosystem master registries for scripts (`scripts/MASTER_SCRIPTS_REGISTRY.md`) and hooks (`hooks/MASTER_HOOKS_REGISTRY.md`).
4. **Canonical Vendor Hierarchy:** Anchors vendor cuts (`google`, `qualcomm`, `nvidia`, `github`, `anthropic`, `primeintellect`, `deepseek`) inside `02_wiki_md/vendors/`.
