

AGENTS.md — Agent Contracts & Operational Boundaries for novus-aeeyre

Scope

Defines operating rules, permissions, and constraints for all worker agents touching the novus-aeeyre repository.

Operational Invariants Codified

1. ****Non-1:1 Condensation Law****: Strip conversational fluff and redundant boilerplate, but preserve 100% of technical rules, parameters, audio sampling rates, buffer configurations, and build fidelity.
2. ****Locality of Reference****: Skills and tools for sensory processing live locally inside skills/ and tools/ within this repository.
3. ****Hard Rule 5 (Extractor Independence)****: Ingestion passes must be verified by corpus-verify using disjoint extractors.
4. ****Red Auditor Stealth Invariant****: Excluded from all public manifests and trees, living strictly in isolated `~/.red/`. The only surface is `red_verdict: pass|fail|n/a`.
5. ****Zero Audio Latency Overhead****: Voice streaming pipelines must route directly to local model endpoints or OmniRoute without blocking main UI loops.
