definitions (YAML frontmatter + SKILL.md)
|   |   | 🔧 extracted_tools/         #   |   |   | Deterministic tools
mined by Files Executive Agent
|   |   |   | cli/                     #   |   |   |   | Shell utilities &
command wrappers (*.sh)
|   |   |   | wrappers/                #   |   |   |   | Python API
wrappers & micro-utilities (*.py)
|   |   |   | ⚙️ runtimes/              #   |   |   |   | Master operational
scripts & execution hooks
|   |   |   | 🛡️ policies/             #   |   |   |   | Self-correction
heuristics & validation schemas
|   |   |   |
|   |   |   | 📁 05_episodic_logs/      #   |   |   |   | 🟡 [TIER 5: EPISODIC
TELEMETRY] Trajectories & RLVR Audits
|   |   |   |   | 📊 manifest.jsonl     #   |   |   |   |   | Local RAG catalog of
sessions, audits & verifiers
|   |   |   |   | ➡️ daily_driver_sync/  #   |   |   |   |   | Ingested logs from
edge device sessions
|   |   |   |   | ⌚ trajectories/       #   |   |   |   |   | Tri-model traces
(Query, Executor, Frontier)
|   |   |   |   | 🟡 red_audit_sandbox/  #   |   |   |   |   | Red Auditor
evaluations & quarantine reports
|   |   |   |   | ⚖️ rlvr_verifiers/    #   |   |   |   |   | Graded assertions &
reward signals (+1.0 / -1.0)
|   |   |   |   | 🧹 hygiene_reports/   #   |   |   |   |   | Schema validation
logs & broken link audits

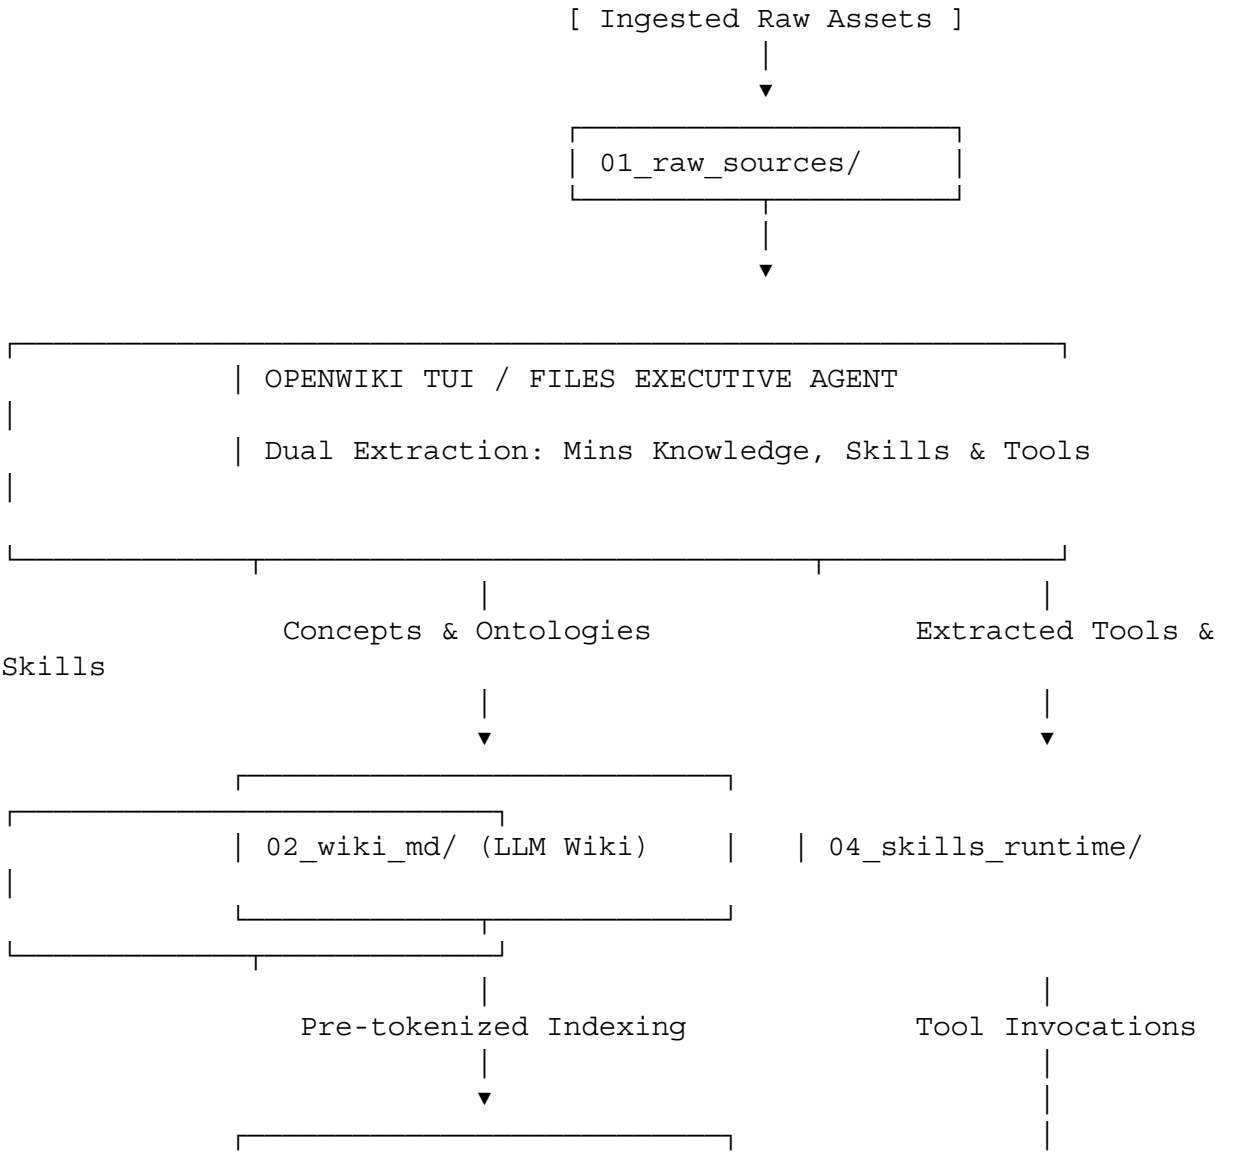

```

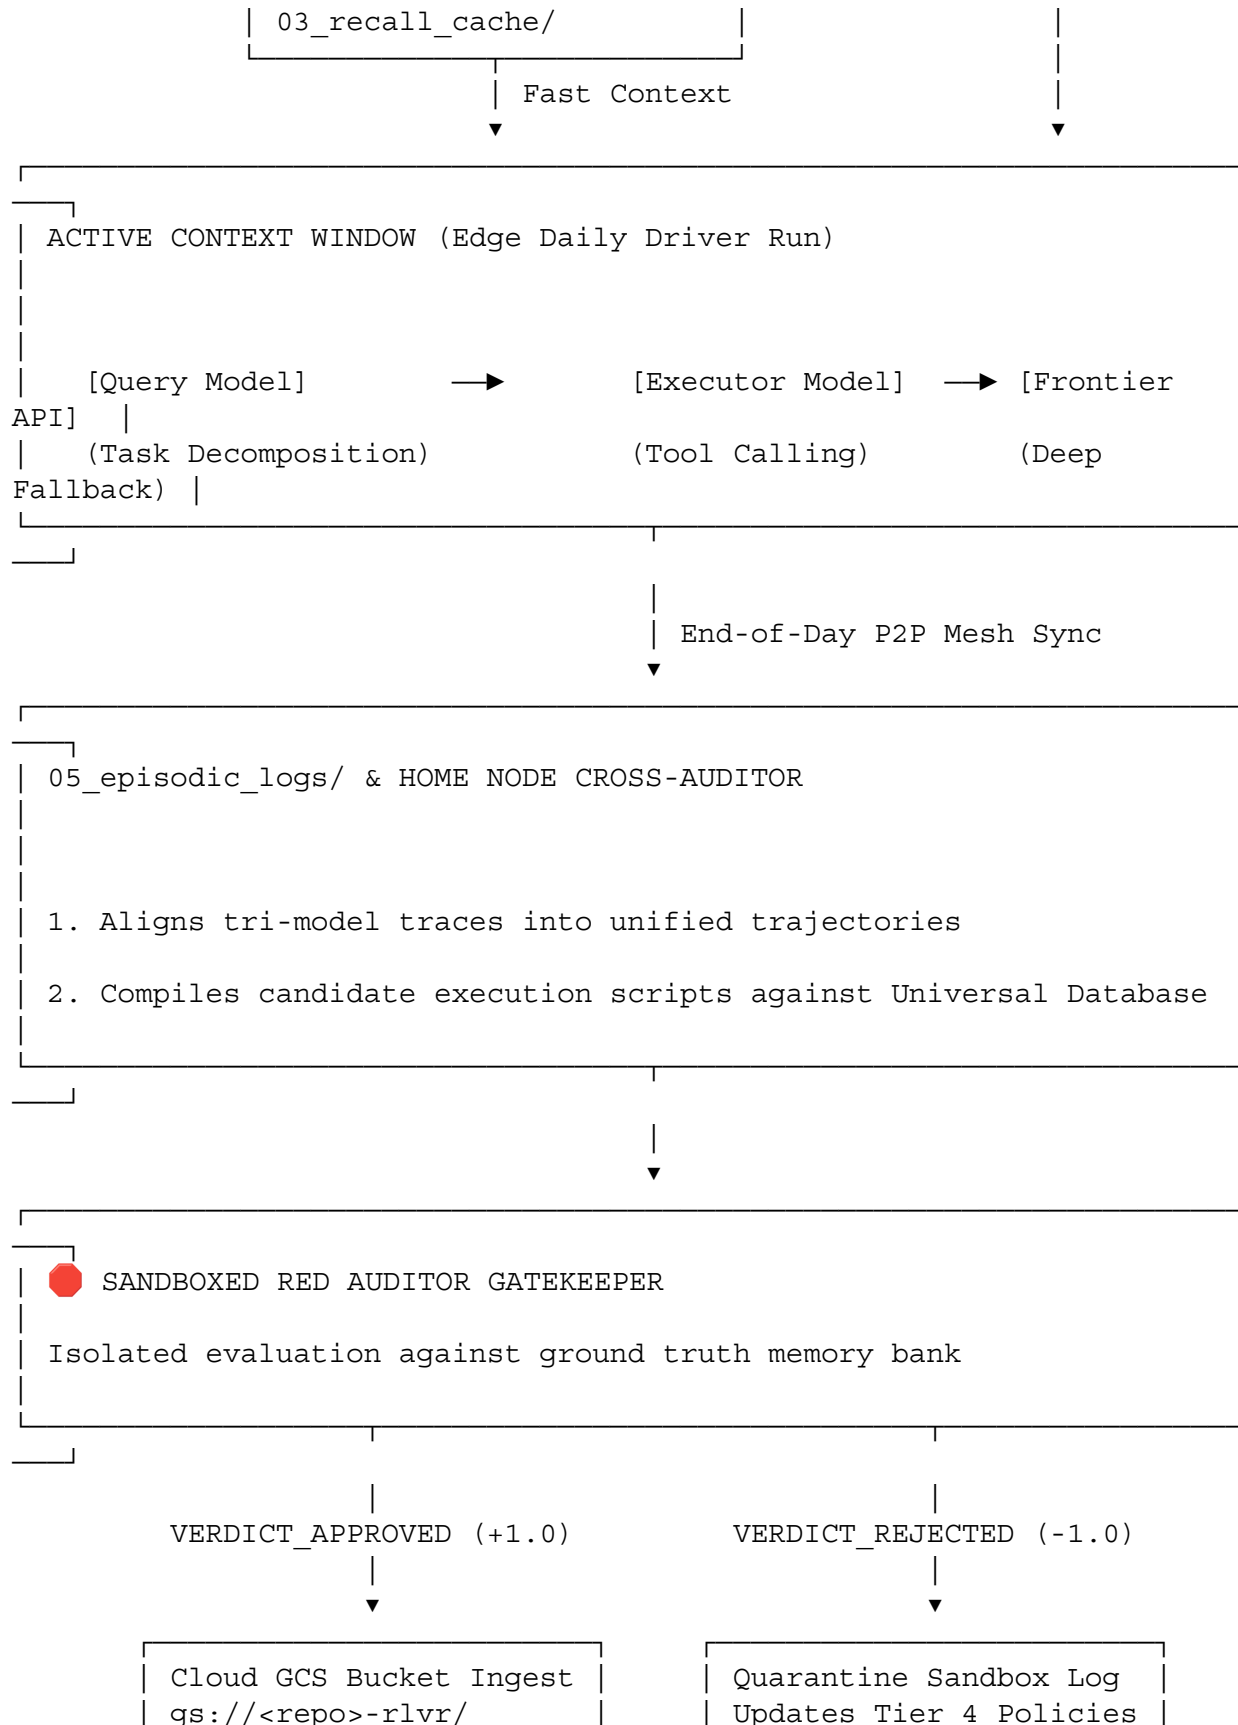

🧩 Detailed Tier & Component Breakdown

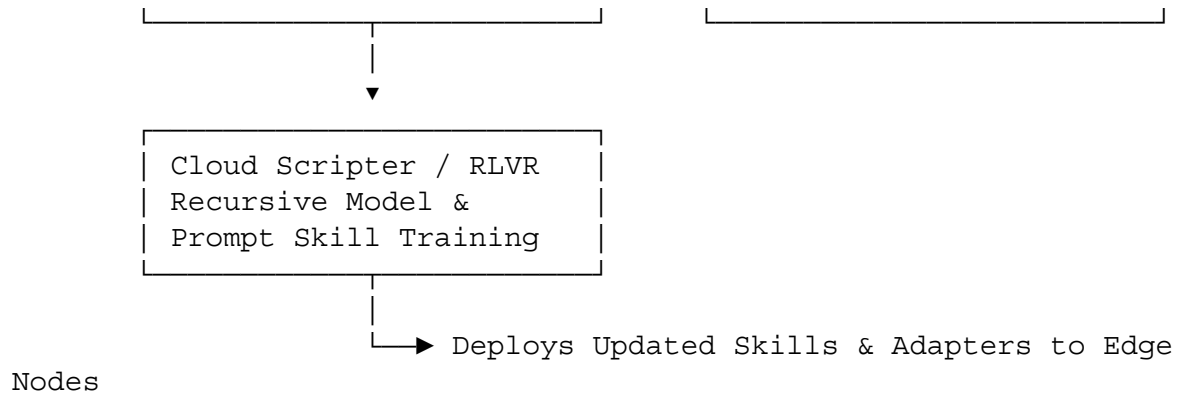

Tier & Icon	Directory Path	Cognitive Role	Managing Entity	Primary Artifacts & Formats
🟡 Metacognitive	/ (Root)	Global Routing Index	Planning Agent	MAP.md (ontology links), manifest.jsonl (global file hash registry).
🟢 Tier 1	01_raw_sources/	Sensory Buffer (Cold)	Ingestion Pipeline	Immutable original files: .pdf, .mp4, .wav, .txt, .html.
🟣 Tier 2	02_wiki_md/	Semantic Memory	Files Executive Agent (<i>OpenWiki TUI</i>)	Linked Markdown wiki notes (.md) with YAML frontmatter.
🟠 Tier 3	03_recall_cache/	Working Memory Buffer	Indexing Workers	Machine-readable .jsonl chunks,

Tier & Icon	Directory Path	Cognitive Role	Managing Entity	Primary Artifacts & Formats
				.faiss vector indices, .db KV tables.
 Tier 4	04_skills_runtime/	Procedural Repertoire	Extraction Engine	SKILL.md prompt files, extracted CLI tools (.sh), Python tools (.py).
 Tier 5	05_episodic_logs/	Episodic Store & Auditing	Cross-Auditor & Red Auditor	Multi-model run traces (.jsonl), verifier rewards, quarantine logs.

 Dynamic System Data Flow

✓ Human Verification Reference

Target Component	Inspection Point	Expected Verification State
Distributed Manifests	Root + all 5 tier folders	Every tier contains a valid, non-empty manifest.jsonl.
LLM Wiki Interlinking	02_wiki_md/ via OpenWiki TUI	Zero dead [[wikilinks]]; frontmatter sources resolve to Tier 1.
Tool/Skill Extraction	04_skills_runtime/	New sources produce both .sh/.py tools and SKILL.md prompts.
P2P Sync Logs	05_episodic_logs/daily_driver_sync/	Day's session logs present with aligned Query/Executor/Frontier tags.
Red Gatekeeper	05_episodic_logs/red_audit_sandbox/	Only scripts marked VERDICT_APPROVED exist in the cloud upload batch.
RLVR Verifier Logs	05_episodic_logs/rlvr_verifiers/	Verified runs show explicit +1.0 or -1.0 reward evaluations.
