

Visual Architecture Map

Tier Architecture Cards (Letter-Optimized)

● Metacognitive Index Layer

- **Location:** / (*Root Directory*)
- **Files:** MAP.md (Human link tree) & manifest.jsonl (Global hash catalog)
- **Operator:** Planning Agent / Router
- **Invariant:** Must be referenced prior to running global workspace lookups.

● Tier 1: Cold Sensory Archive

- **Location:** 01_raw_sources/
- **Subfolders:** pdf/, media/, text/
- **Operator:** Ingestion Pipeline
- **Artifacts:** Unaltered source files (.pdf, .mp4, .wav, .txt, .html).
- **Invariant:** **Strictly Read-Only**. Never modified by automated agents.

● Tier 2: The LLM Wiki

- **Location:** 02_wiki_md/
- **Subfolders:** concepts/, architectures/, entities/, indexes/
- **Operator:** Files Executive Agent (*OpenWiki TUI*)
- **Artifacts:** Interlinked Markdown notes (.md) with YAML frontmatter.
- **Invariant:** Zero broken [[wikilinks]]; updates trigger manifest sync.

● Tier 3: Recall Cache

- **Location:** 03_recall_cache/
- **Subfolders:** jsonl/, vectors/, kv_store/
- **Operator:** Indexing Workers
- **Artifacts:** Pre-tokenized .jsonl passages, dense vector indices, KV lookups.
- **Invariant:** **Ephemeral & Rebuildable**. Safe to wipe and regenerate.

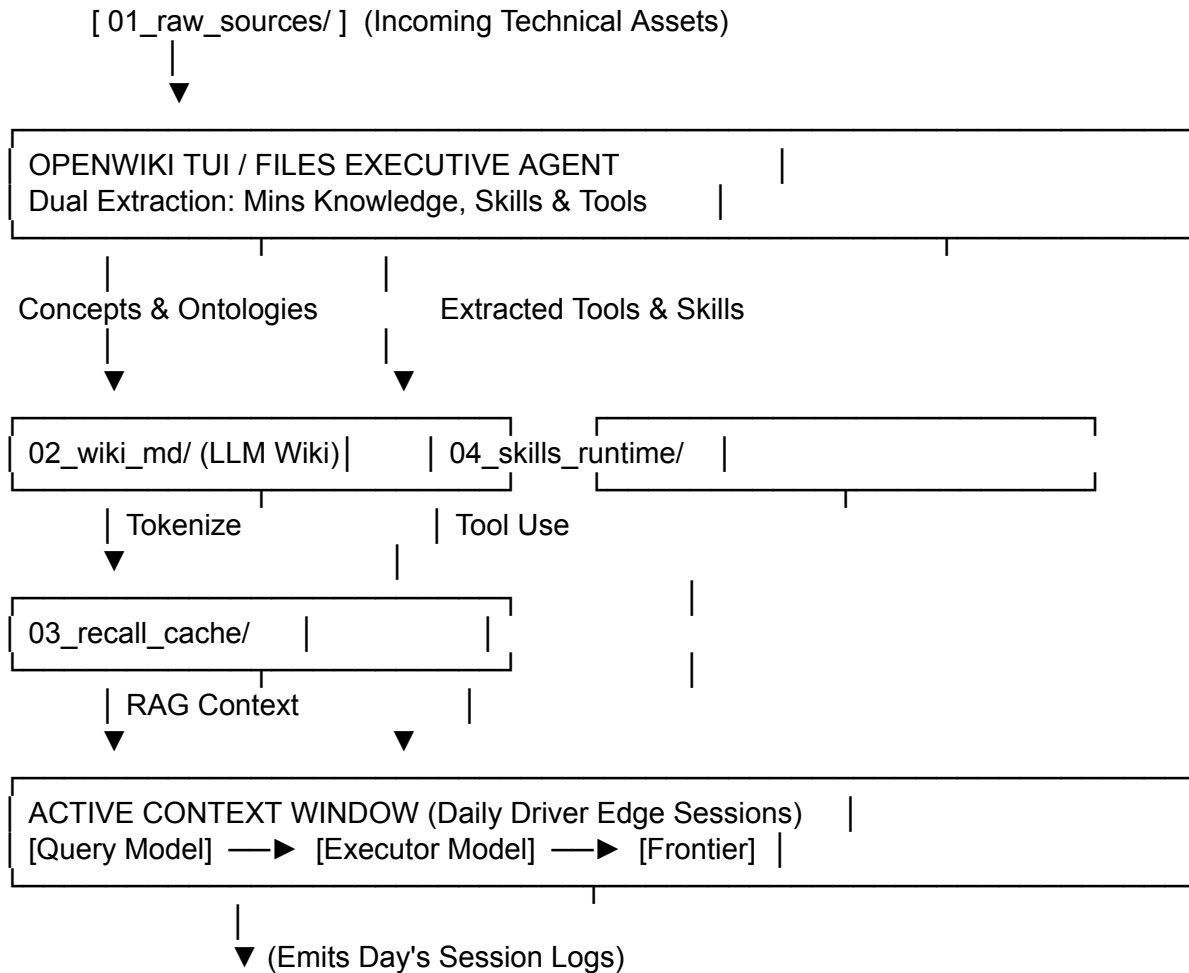

● Tier 4: Procedural Memory & Extracted Tools

- **Location:** 04_skills_runtime/
- **Subfolders:** prompt_skills/, extracted_tools/{cli,wrappers}, runtimes/, policies/
- **Operator:** Compilation Engine
- **Artifacts:** SKILL.md files, executable shell tools (.sh), Python tools (.py).
- **Invariant:** Enforces dual extraction (skills + executable tools).

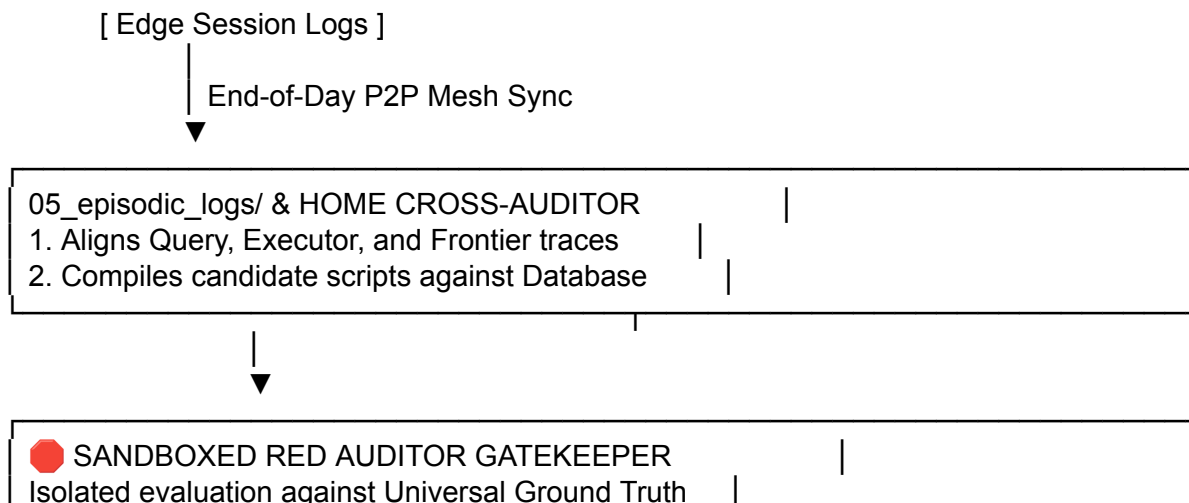

● Tier 5: Episodic Memory & Telemetry

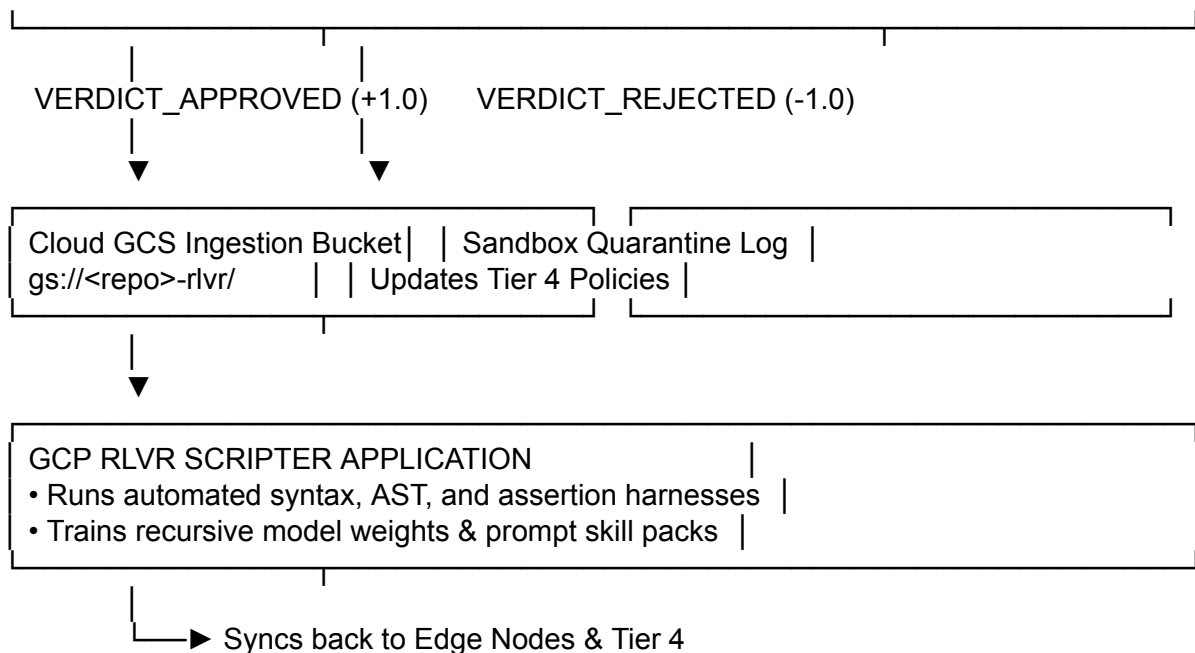

- **Location:** 05_episodic_logs/
- **Subfolders:** daily_driver_sync/, trajectories/, red_audit_sandbox/, rlvr_verifiers/
- **Operator:** Home Cross-Auditor & Sandboxed Red Auditor
- **Artifacts:** Multi-model run traces (.jsonl), verifier logs, quarantine records.
- **Invariant:** **Append-Only**. Stores historical traces and RLVR rewards.

Data Flow 1: Daytime Ingestion & Context Loop

Data Flow 2: Nighttime P2P Audit & Cloud RLVR Loop

✓ Verification Reference Table (Letter-Optimized)

Subsystem	Audit Target	Expected Status
Manifests	Root + all 5 tier folders	Valid manifest.jsonl in every tier.
LLM Wiki	02_wiki_md/ in OpenWiki TUI	Zero dead [[wikilinks]]; valid frontmatter.
Extraction	04_skills_runtime/	New docs yield both tools (.sh/.py) and skills (.md).
P2P Sync	05_episodic_logs/daily_driver_sync/	Daily logs arrive with tri-model tags.
Red Gate	05_episodic_logs/red_audit_sandbox/	Cloud upload queue contains only VERDICT_APPROVED.
RLVR Log	05_episodic_logs/rlvr_verifiers/	Verified runs record explicit +1.0 or -1.0.
