

MAP.md — raw_database Repository Navigation Map

Subsystem Role

Cold sensory ground truth, raw data ingestion & interceptor extraction zone for the NovÆx corpus ecosystem.

Component Ontology & Directories

- `raw/`: Incoming sensory landing zone for unprocessed source documents awaiting normalization.
- `clean\_md/`: Normalized, non-1:1 condensed markdown files.
- `wiki\_md/`: Compounding living wiki knowledge nodes.
- `skills/`: Local procedural skills developed and applied within this repository.
- `tools/`: Local executable tools, extractors, and CLI utilities.
- `scripts/`: Production shell and Python execution scripts.
- `hooks/`: Ingestion, validation, and lifecycle hooks.
- `pending/`: Unprocessed intake backlog and staged ingestion batches.
- `audit/`: Verification traces, extraction diffs, and validation logs.
- `archive/`: Historical source batches and retired snapshots.
- `spark\_recommendations/`: Spark architecture recommendations and reference documents.
- `02\_MY\_ORIGINALS/`: Staged uncompressed original source files awaiting Phase 1 normalization.

Governing Specifications & Pointers

- [[Universal file configuration]]: Master 8-repo layout & condensation laws.
- [[A OPERATOR_MAP.md]]: Ecosystem deliverables ledger & repository cross-references.
- [[PROPOSAL-V2-CORRECTED-WIKI-TERMINOLOGY-AND-s-tier-ALTERNATIVE.md]]: First-Move Directive & canonical terminology.
- [[04_ON_DEVICE_INGESTION_AND_W5H_FRAMEWORK.md]]: On-device ingestion matrix & pre-tokenized markers.
