

RESUME.md — State Tracker & Active Session

Checkpoints: aesop-xi

Subsystem: `aesop-xi/`

Current State: ACTIVE / PROVISIONED

Last Synchronized: 2026-09-07T02:00:00Z

1. Subsystem Provisioning Checklist

- ☑ **Repository Root Navigation:** `MAP.md`, `manifest.jsonl`, `AGENTS.md`, `RESUME.md`, `UNRESOLVED.md` established.
 - ☑ **Arbitration Core (`arbitration/`):**
 - `arbitration_engine.py`: Inter-agent priority arbitrator & ClearanceToken engine operational and tested.
 - `hardware_throttler.py`: Real-time thermal and RAM headroom task shedder operational and tested.
 - ☑ **Policy Governance (`policies/`):**
 - `tool_usage_guardrails.json`: Machine-readable tool permissions and path gates established.
 - `security_clearance.yaml`: OAuth boundaries and per-agent role matrix codified.
 - `zero_trust_rules.md`: Sensory immutability and sandboxed verification laws active.
 - ☑ **Red Sandbox Isolation (`.incognito_red_sandbox/`):**
 - `run_audit.sh`: Background daemon verified in place.
 - `sandbox_evaluator.py`: Adversarial compliance and hallucination checker operational and tested.
-

2. Active Session Markers & Checkpoints

- **Checkpoint 1:** Baseline policies compiled and verified without legacy naming drift.
- **Checkpoint 2:** Arbitration preemption self-test verified (+1.0).
- **Checkpoint 3:** Sandbox evaluator verification tests passed (+1.0).
