

UNRESOLVED.md — Pending Policy Items, Edge Cases & Tickets: aesop-xi

Subsystem: `aesop-xi/`

Status: Monitored by Chief Ethical Orchestration Protocol

Open Tickets & Backlog

1. Ticket #01: Real-Time FastRPC Thermal Telemetry Hook

- *Description:* Currently `hardware_throttler.py` reads `/sys/class/thermal/` with a safe nominal fallback. Implement direct Qualcomm QAIRT C++ binding hook into Snapdragon 8 Elite Hexagon v79 HTP thermal registers when running inside `aesc`.
- *Status:* Staged for Phase 2 hardware integration.

2. Ticket #02: Audit Ledger Synchronization with `#d.u.m.b.a.s.s.`

- *Description:* Finalize automated sync bridge connecting local `state/audit_ledger.db` into the central PostgreSQL / SQLite universal memory bank on Node Beta (Jetson Orin Nano).
- *Status:* Pending `#d.u.m.b.a.s.s.` schema finalization.

3. Ticket #03: Cross-Node Tailscale Token Rotation

- *Description:* Define automated 24-hour key rotation for HMAC clearance tokens passed between Node Alpha (Motorola Razr) and Node Beta (Jetson) over local Tailscale mesh.
- *Status:* Under review.
