

MAP.md — skills-and-capabilities Navigation & Topology

Repository Identity & Purpose

`skills-and-capabilities/` is the shared analytical, code review, vault hygiene, and procedural skills repository. It centralizes reusable tools and workflows so individual agents across other repositories do not rewrite common utilities.

Directory Topology

skills-and-capabilities/

— MAP.md	# This navigation index & ontology map
— manifest.jsonl	# Machine-readable registry of all modules, tools & skills
— README_SKILLS_AND_CAPABILITIES.md	# Subsystem overview & W5+H identity
— AGENTS.md	# Operational boundaries & CLI guidelines for agents
— RESUME.md	# Active tool registry state & verification records
— UNRESOLVED.md tickets	# Pending feature enhancements & open backlog
— code-review-graph/	# PyGraphify / AST Code Review Engine
— graph_builder.py	# Python AST parser generating dependency graphs
— visual_topology_map.md	# Structural guide for interpreting code graphs
— notebook-lmpy/	# Deep Corpus Analytical Query Engine

- | |— query_notebook.py # Multi-document analytical querying script
- | |— source_packager.py # Curated markdown source packager & bundler
- |
- |— obsidian-skills/ # Vault Integration & Hygiene Engine
- | |— graph_sync.py # Syncs markdown wikilinks & generates graph metadata
- | |— markor_sweeper.py # Scans for unregistered notes and context leaks
- |
- |— prompt_skills/ # Matt Pocock Engineering Skills Suite
- | |— grill-me.md # Aggressive question-based specification refining
- | |— spec.md # Architectural specification drafting
- | |— ticket.md # Atomic issue/task ticket creation
- | |— tdd.md # Test-driven development implementation
- | |— code-review.md # Strict AST-based code review & verification
- |
- |— early-trend-scraper/ # Autonomous Pre-Trend Research Daemon
 - |— daily_scraper.py # Scheduled web scraper monitoring repos
 - |— stack_analyzer.py # Divergence analyzer between web and vault
 - |— trending_databank.jsonl # Telemetry tracking early tech trends

Core Tool Invocations

Subsystem	Tool	Invocation Pattern
AST Code Graphs	<code>graph_builder.py</code>	<code>python3 code-review-graph/graph_ h_builder.py --dir <target_repo> --format md</code>
Notebook Research	<code>query_notebook.py</code>	<code>python3 notebook-lmpy/query_no tebook.py --query "<topic>" --source-dir <path></code>
Source Bundler	<code>source_packager.py</code>	<code>python3 notebook-lmpy/source_p ackager.py --dir <notes_dir> --output bundle.md</code>
Obsidian Sync	<code>graph_sync.py</code>	<code>python3 obsidian-skills/graph_ sync.py --dir <vault_dir> --format md</code>
Markor Sweeper	<code>markor_sweeper.py</code>	<code>python3 obsidian-skills/markor_ sweeper.py --dir <notes_dir> --manifest manifest.jsonl</code>
