

OPERATOR_README.md — Master Ecosystem Guide & Output Navigator

Project: NovusÆxenti / NovÆcopia Distributed Edge AI Architecture

Motto: *Xçineribus, in-variis-nunquam-varius, Novi-Æxentis-Copiæ, Vincent*

(From the ashes, unwavering in the midst of adversity, new forces of abundance conquer)

Living Core: ÆEsc & Æyre — Decoupled native APKs providing terminal execution and sensory ingress alongside Horizons UI.

1. Where Your Output Lives (Google Drive Directories)

All generated specifications, living repository structures, production scripts, and audit reports are organized into two primary, dedicated Google Drive folders:

1. 📁 NovÆxorpus_LIVING_MASTER_CANON

The Living Repository Replica. Structured with real subdirectories to mirror the physical git repository layout:

- **Root:** Master Specifications (00 through 05, README.md, MAP.md, RESUME.md).
- **aesop-xi/:** Ethical governance, arbitration, and the sealed .incognito_red_sandbox/ (with run_audit.sh).
- **novus-aexenti/:** Cognitive MoE brain (0.8B Triage & 9B Reasoning).
- **novaexopia/:** The "Claw" (Horizons UI, ÆEsc terminal daemon, Æyre media daemon, Prime Agent harness).
- **vendor-corpora/:** Low-level Qualcomm Hexagon HTP FastRPC and Google Android NDK ASharedMemory / socket specs.
- **skills-and-capabilities/:** PyGraphify AST code graphs, NotebookLM-py, and Obsidian sync tools.
- **data_vault/:** 5+1 Cognitive Memory core (01_raw_sources/ through 05_episodic_logs/).
- **tools/:** 9 standalone production scripts (system_housekeeper.sh, agent_panel.sh, npu_manager.py, etc.).

2. 📁 LEX-NOVI-Review-OUTPUT

The Master Folder 2 Audit Vault. Contains the 12 file-by-file audit reports and capstone syntheses covering all 14 subfolders of __Lex-Novi-Æxentis-Copiæ.
