

POINTER.md — raw_database Specification

Repository: raw_database (Cold Sensory Ground Truth & Ingestion Zone)

Authority: Universal file configuration & A OPERATOR_MAP.md

Core Architectural Invariants & Phase 1 Intake

1. Phase 1 Normalization Intake: Raw sources landing from 02_MY_ORIGINALS await conversion to normalized UTF-8 Markdown with YAML frontmatter.
2. Non-1:1 Condensation Law: Preserves 100% build instructions, schema rules, and technical parameters while eliminating conversational fat.
3. Dual Extraction Target: Heuristics extract into skills/ and executable scripts into tools/.
4. Independent RLVR Validation: Hard Rule 5 mandates verification via corpus-verify (tools/check.py) using disjoint extractors before committing to the Living Wiki.
5. Recommendation Archive: Staged proposals and template packages are sequestered in spark_recommendations/.
