🔗 Claude Code Skills & Plugins — Agent Skills for Every Coding Tool

246 production-ready Claude Code skills, plugins, and agent skills for 12 AI coding tools.

The most comprehensive open-source library of Claude Code skills and agent plugins — also works with OpenAI Codex, Gemini CLI, Cursor, and 7 more coding agents. Reusable expertise packages covering engineering, DevOps, marketing, compliance, C-level advisory, and more.

VALIDATED

5,200+ GitHub stars – the most comprehensive open-source Claude Code skills & agent plugins library.

What Are Claude Code Skills & Agent Plugins?

Claude Code skills (also called agent skills or coding agent plugins) are modular instruction packages that give AI coding agents domain expertise they don't have out of the box. Each skill includes:

- **SKILL.md** – structured instructions, workflows, and decision frameworks
- **Python tools** – 359 CLI scripts (all stdlib-only, zero pip installs)
- **Reference docs** – templates, checklists, and domain-specific knowledge

One repo, eleven platforms. Works natively as Claude Code plugins, Codex agent skills, Gemini CLI skills, and converts to 8 more tools via `scripts/convert.sh`. All 359 Python tools run anywhere Python runs.

Skills vs Agents vs Personas

	Skills	Agents	Personas
Purpose	How to execute a task	What task to do	Who is thinking
Scope	Single domain	Single domain	Cross-domain
Voice	Neutral	Professional	Personality-driven
Example	"Follow these steps for SEO"	"Run a security audit"	"Think like a startup CTO"

All three work together. See [Orchestration](#) for how to combine them.

Quick Install

Gemini CLI (New)

```
# Clone the repository
git clone https://github.com/alirezarezvani/claude-skills.git
cd claude-skills

# Run the setup script
./scripts/gemini-install.sh

# Start using skills
> activate_skill(name="senior-architect")
```

Claude Code (Recommended)

```
# Add the marketplace
/plugin marketplace add alirezarezvani/claude-skills

# Install by domain
/plugin install engineering-skills@claude-code-skills
/plugin install engineering-advanced-skills@claude-code-skills
/plugin install product-skills@claude-code-skills
/plugin install marketing-skills@claude-code-skills
/plugin install ra-qm-skills@claude-code-skills
/plugin install pm-skills@claude-code-skills
/plugin install c-level-skills@claude-code-skills
/plugin install business-growth-skills@claude-code-skills
/plugin install finance-skills@claude-code-skills

# 24 core engineering
# 25 POWERFUL-tier
# 12 product skills
# 43 marketing skills
# 12 regulatory/quality
# 6 project management
# 28 C-level advisory (full C-suite)
# 4 business & growth
# 2 finance (analyst + SaaS metrics)
```

```
# Or install individual skills
/plugin install skill-security-auditor@claude-code-skills
/plugin install playwright-pro@claude-code-skills
/plugin install self-improving-agent@claude-code-skills
/plugin install content-creator@claude-code-skills

# Security scanner
# Playwright testing toolkit
# Auto-memory curation
# Single skill
```

OpenAI Codex

```
npm agent-skills-cli add alirezarezvani/claude-skills --agent codex
# Or: git clone + ./scripts/codex-install.sh
```

OpenClaw

```
bash <(curl -s https://raw.githubusercontent.com/alirezarezvani/claude-skills/main/scripts/openclaw-install.sh)
```

Manual Installation

```
git clone https://github.com/alirezarezvani/claude-skills.git
# Copy any skill folder to ~/.claude/skills/ (Claude Code) or ~/.codex/skills/ (Codex)
```

Multi-Tool Support (New)

Convert all 156 skills to 7 AI coding tools with a single script:

Tool	Format	Install
Cursor	.mdc rules	./scripts/install.sh --tool cursor --target .
Aider	CONVENTIONS.md	./scripts/install.sh --tool aider --target .
Kilo Code	.kilocode/rules/	./scripts/install.sh --tool kilocode --target .
Windsurf	.windsurf/skills/	./scripts/install.sh --tool windsurf --target .
OpenCode	.opencode/skills/	./scripts/install.sh --tool opencode --target .
Augment	.augment/rules/	./scripts/install.sh --tool augment --target .
Antigravity	~/.gemini/antigravity/skills/	./scripts/install.sh --tool antigravity
Hermes Agent	~/.hermes/skills/	python scripts/sync-hermes-skills.py --verbose

How it works:

```
# 1. Convert all skills to all tools (takes ~15 seconds)
./scripts/convert.sh --tool all

# 2. Install into your project (with confirmation)
./scripts/install.sh --tool cursor --target /path/to/project

# Or use --force to skip confirmation:
./scripts/install.sh --tool aider --target . --force

# 3. Verify
find .cursor/rules -name "*.mdc" | wc -l # Should show 156
```

Each tool gets:

- ✓ All 156 skills converted to native format
- ✓ Per-tool README with install/verify/update steps
- ✓ Support for scripts, references, templates where applicable

-  Zero manual conversion work

Run `./scripts/convert.sh --tool all` to generate tool-specific outputs locally.

Skills Overview

246 skills across 9 domains:

Domain	Skills	Highlights	Details
 Engineering – Core	32	Architecture, frontend, backend, fullstack, QA, DevOps, SecOps, AI/ML, data, Playwright, self-improving agent, security suite (6), a11y audit	engineering-team/
 Playwright Pro	9+3	Test generation, flaky fix, Cypress/Selenium migration, TestRail, BrowserStack, 55 templates	engineering-team/playwright-pro
 Self-Improving Agent	5+2	Auto-memory curation, pattern promotion, skill extraction, memory health	engineering-team/self-improving-agent
 Engineering – POWERFUL	40	Agent designer, RAG architect, database designer, CI/CD builder, security auditor, MCP builder, AgentHub, Helm charts, Terraform, self-eval, llm-wiki, tc-tracker, reliability portfolio (feature-flags-architect, kubernetes-operator, chaos-engineering, slo-architect), ship-gate	engineering/
 Product	13	Product manager, agile PO, strategist, UX researcher, UI design, landing pages, SaaS scaffolder, analytics, experiment designer, discovery, roadmap communicator, code-to-prd, apple-hig-expert	product-team/
 Marketing	44	7 pods: Content (8), SEO (5), CRO (6), Channels (6), Growth (4), Intelligence (4), Sales (2) + context foundation + orchestration router. 32 Python tools.	marketing-skill/
 Project Management	9	Senior PM, scrum master, Jira, Confluence, Atlassian admin, templates + bundled Atlassian Remote MCP	project-management/
 Regulatory & QM	14	ISO 13485, MDR 2017/745, FDA, ISO 27001, GDPR, SOC 2, CAPA, risk management	ra-qm-team/
 C-Level Advisory	28	Full C-suite (10 roles) + orchestration + board meetings + culture & collaboration	c-level-advisor/
 Business & Growth	5	Customer success, sales engineer, revenue ops, contracts & proposals, BizDev toolkit	business-growth/
 Finance	3	Financial analyst (DCF, budgeting, forecasting), SaaS metrics coach, business investment advisor	finance/

Personas

Pre-configured agent identities with curated skill loadouts, workflows, and distinct communication styles. Personas go beyond "use these skills" — they define how an agent thinks, prioritizes, and communicates.

Persona	Domain	Best For
Startup CTO	Engineering + Strategy	Architecture decisions, tech stack selection, team building, technical due diligence
Growth Marketer	Marketing + Growth	Content-led growth, launch strategy, channel optimization, bootstrapped marketing
Solo Founder	Cross-domain	One-person startups, side projects, MVP building, wearing all hats

Usage:

```
# Claude Code
cp agents/personas/startup-cto.md ~/.claude/agents/
```

```
# Any tool
./scripts/convert.sh --tool cursor # Converts personas too
```

See [agents/personas/](#) for details. Create your own with [TEMPLATE.md](#).

🔗 Orchestration

A lightweight protocol for coordinating personas, skills, and agents on work that crosses domain boundaries. No framework required.

Four patterns:

Pattern	What	When
Solo Sprint	Switch personas across project phases	Side projects, MVPs, solo founders
Domain Deep-Dive	One persona + multiple stacked skills	Architecture reviews, compliance audits
Multi-Agent Handoff	Personas review each other's output	High-stakes decisions, launch readiness
Skill Chain	Sequential skills, no persona needed	Content pipelines, repeatable checklists

Example: 6-week product launch

```
Week 1-2: startup-cto + aws-solution-architect + senior-frontend → Build
Week 3-4: growth-marketer + launch-strategy + copywriting + seo-audit → Prepare
Week 5-6: solo-founder + email-sequence + analytics-tracking → Ship and iterate
```

See [orchestration/ORCHESTRATION.md](#) for the full protocol and examples.

🔗 POWERFUL Tier

25 advanced skills with deep, production-grade capabilities:

Skill	What It Does
agent-designer	Multi-agent orchestration, tool schemas, performance evaluation
agent-workflow-designer	Sequential, parallel, router, orchestrator, and evaluator patterns
rag-architect	RAG pipeline builder, chunking optimizer, retrieval evaluator
database-designer	Schema analyzer, ERD generation, index optimizer, migration generator
database-schema-designer	Requirements → migrations, types, seed data, RLS policies
migration-architect	Migration planner, compatibility checker, rollback generator
skill-security-auditor	🔒 Security gate — scan skills for malicious code before installation
ci-cd-pipeline-builder	Analyze stack → generate GitHub Actions / GitLab CI configs
mcp-server-builder	Build MCP servers from OpenAPI specs
pr-review-expert	Blast radius analysis, security scan, coverage delta
api-design-reviewer	REST API linter, breaking change detector, design scorecard
api-test-suite-builder	Scan API routes → generate complete test suites
dependency-auditor	Multi-language scanner, license compliance, upgrade planner
release-manager	Changelog generator, semantic version bumper, readiness checker
observability-designer	SLO designer, alert optimizer, dashboard generator

Skill	What It Does
performance-profiler	Node/Python/Go profiling, bundle analysis, load testing
monorepo-navigator	Turborepo/Nx/pnpm workspace management & impact analysis
changelog-generator	Conventional commits → structured changelogs
codebase-onboarding	Auto-generate onboarding docs from codebase analysis
runbook-generator	Codebase → operational runbooks with commands
git-worktree-manager	Parallel dev with port isolation, env sync
env-secrets-manager	.env management, leak detection, rotation workflows
incident-commander	Incident response playbook, severity classifier, PIR generator
tech-debt-tracker	Codebase debt scanner, prioritizer, trend dashboard
interview-system-designer	Interview loop designer, question bank, calibrator

Skill Security Auditor

New in v2.0.0 — audit any skill for security risks before installation:

```
python3 engineering/skill-security-auditor/scripts/skill_security_auditor.py /path/to/skill/
```

Scans for: command injection, code execution, data exfiltration, prompt injection, dependency supply chain risks, privilege escalation. Returns **PASS / WARN / FAIL** with remediation guidance.

Zero dependencies. Works anywhere Python runs.

Recently Enhanced Skills

Production-quality upgrades added for:

- `engineering/git-worktree-manager` — worktree lifecycle + cleanup automation scripts
- `engineering/mcp-server-builder` — OpenAPI -> MCP scaffold + manifest validator
- `engineering/changelog-generator` — release note generator + conventional commit linter
- `engineering/ci-cd-pipeline-builder` — stack detector + pipeline generator
- `marketing-skill/prompt-engineer-toolkit` — prompt A/B tester + prompt version/diff manager

Each now ships with `scripts/`, extracted `references/`, and a usage-focused `README.md`.

Usage Examples

Architecture Review

Using the `senior-architect` skill, review our microservices architecture and identify the top 3 scalability risks.

Content Creation

Using the `content-creator` skill, write a blog post about AI-augmented development. Optimize for SEO targeting "Claude Code tutorial".

Compliance Audit

Using the `mdr-745-specialist` skill, review our technical documentation for MDR Annex II compliance gaps.

Python Analysis Tools

305 CLI tools ship with the skills (all verified, stdlib-only):

```
# SaaS health check
python3 finance/saas-metrics-coach/scripts/metrics_calculator.py --mrr 80000 --customers 200 --churned 3 --json

# Brand voice analysis
python3 marketing-skill/content-production/scripts/brand_voice_analyzer.py article.txt

# Tech debt scoring
python3 c-level-advisor/cto-advisor/scripts/tech_debt_analyzer.py /path/to/codebase

# RICE prioritization
python3 product-team/product-manager-toolkit/scripts/rice_prioritizer.py features.csv

# Security audit
python3 engineering/skill-security-auditor/scripts/skill_security_auditor.py /path/to/skill/

# Landing page (TSX + Tailwind)
python3 product-team/landing-page-generator/scripts/landing_page_scaffolder.py config.json --format tsx
```

Related Projects

Project	Description
Claude Code Skills & Agents Factory	Methodology for building skills at scale
Claude Code Tresor	Productivity toolkit with 60+ prompt templates
Product Manager Skills	Senior PM agent with 6 knowledge domains, 12 templates, 30+ frameworks — discovery, strategy, delivery, SaaS metrics, career coaching, AI product craft
toprank	9 SEO and Google Ads skills for Claude Code — connects Google Search Console, PageSpeed Insights, and Google Ads API; ships meta tag, schema markup, and keyword bid fixes to source or CMS. MIT, 107 stars

FAQ

How do I install Claude Code plugins? Add the marketplace with `/plugin marketplace add alirezarezvani/claude-skills`, then install any skill bundle with `/plugin install <name>@claude-code-skills`.

Do these skills work with OpenAI Codex / Cursor / Windsurf / Aider? Yes. Skills work natively with 12 tools: Claude Code, OpenAI Codex, Gemini CLI, OpenClaw, Hermes Agent, Cursor, Aider, Windsurf, Kilo Code, OpenCode, Augment, and Antigravity. Hermes Agent uses the same `agentskills.io SKILL.md` standard — run `python scripts/sync-hermes-skills.py` to install. For other tools run `./scripts/convert.sh --tool all` then `./scripts/install.sh --tool <name>`. See [Multi-Tool Integrations](#) for details.

Will updating break my installation? No. We follow semantic versioning and maintain backward compatibility within patch releases. Existing script arguments, plugin source paths, and `SKILL.md` structures are never changed in patch versions. See the [CHANGELOG](#) for details on each release.

Are the Python tools dependency-free? Yes. All 305 Python CLI tools use the standard library only — zero pip installs required. Every script is verified to run with `--help`.

How do I create my own Claude Code skill? Each skill is a folder with a `SKILL.md` (frontmatter + instructions), optional `scripts/`, `references/`, and `assets/`. See the [Skills & Agents Factory](#) for a step-by-step guide.

🔗 Contributing

We welcome contributions! See [CONTRIBUTING.md](#) for guidelines.

Quick ideas:

- Add new skills in underserved domains
- Improve existing Python tools
- Add test coverage for scripts
- Translate skills for non-English markets
